1.题目要求: 建立一个企业库存管理系统, 使用B/S架构完成系统开发

1.1 建立基本表

- 客户基本信息表:客户编号、客户姓名、客户类型、联系人、联系电话、通信地址、备注;
- 仓库基本信息表:仓库编号、仓库名称、仓库说明;
- 产品基本信息表:产品编号、产品名称、产品规格、参考价格、数量上限、数量下限等;
- 产品基本信息表:产品编号、产品名称、产品规格、参考价格、数量上限、数量下限等;
- 库存基本信息表: 存储编号、产品编号、仓库编号、产品入库单价、产品数量、生产日期等;
- 出入库信息表: 出入库操作类型、出入库产品编号、生产日期、出入库产品单价、出入库产品数量、客户编号、仓库编号、经办人、出入库日期、出入库标记;

1.2 系统应包括以下主要功能:

- (1) 入库管理: 主要管理采购入库、生产入库、退货入库、退料入库;
- (2) 出库管理:主要管理销售出库、退货出库、用料出库;
- (3) 产品基本信息管理:产品基本信息添加、修改、查询、删除;
- (4) 统计查询: 主要管理产品出入库统计报表和库存流水统计报表;

2.需求分析

2.1 系统使用者

根据描述,这个系统的使用者可以设为只有一种,就是企业的库存管理人员。管理人员应该具有的功能:

- 出入库管理与出入库统计。管理人员,即用户(以下均称为用户),可以实现出入库的增删改查,但是考虑到一个企业是否允许用户修改(删除)出入库记录的问题,如果不允许,可以在源代码中注释掉相应入口即可。为了使系统功能更加全面,默认是带有修改(删除)功能的。出入库统计可以按天统计,统计每天的出入库数据。
- 库存管理及库存流水统计。用户可以实现库存的增删改查。与出入库相同,这里也有同样的问题。如果不允许用户修改或删除某条记录,将入口注释掉即可。库存流水统计可以单独建一个表(stock_statistics),每当有出入库记录生产时,将产品的数量变化同步生产到该表中。流水统计查看该表即可。
- 产品基本信息的管理。用户可以实现增删改查功能。
- 仓库管理。用户可以实现增删改查功能。
- 客户信息管理。用户可以实现增删改查功能。

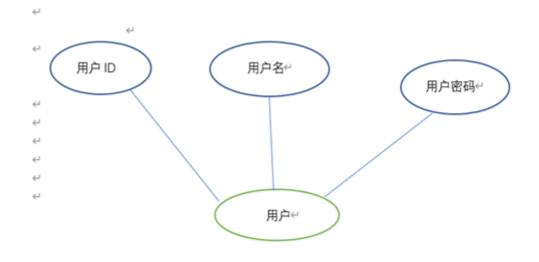

2.2 其他雲求

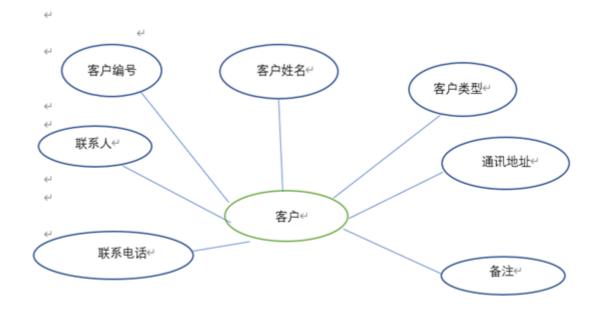

- 用户的登录与退出。需要建立一个用户表,由系统开发人员事先分配好用户。用户登录时,将输入信息与用户表中的信息进行匹配,实现登录的限制。还需要设计退出接口,当用户点击时,即可退出系统。
- 用户登录状态的检测。如果用户通过连接进入到非登录页面,需要自定跳转到登录界面。

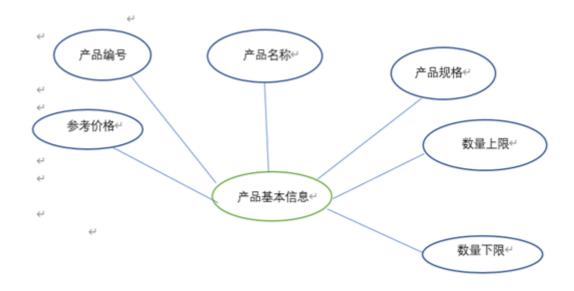

3. 数据库设计

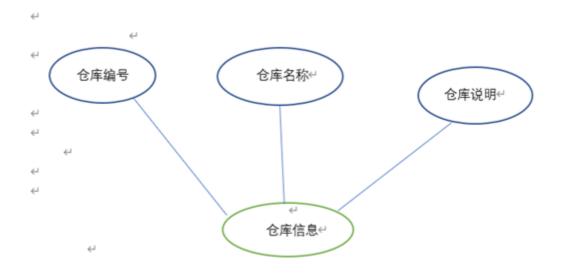

3.1 概念结构设计

采用 E—R 方法进行数据库的概念设计,分数据抽象,设计局部概念模式,设计全 局概念模式三个过程。局部 E-R 模型如下:

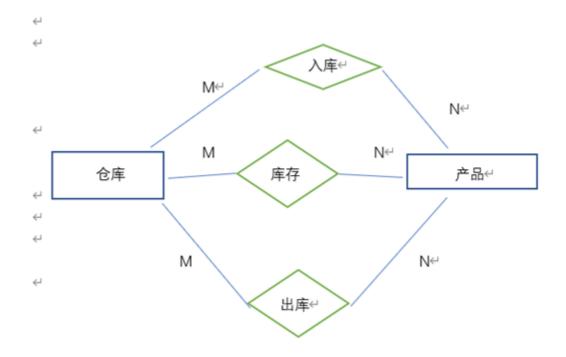

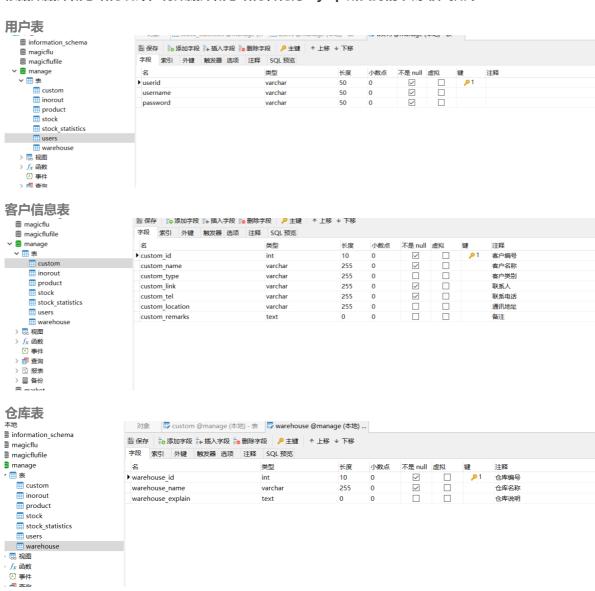

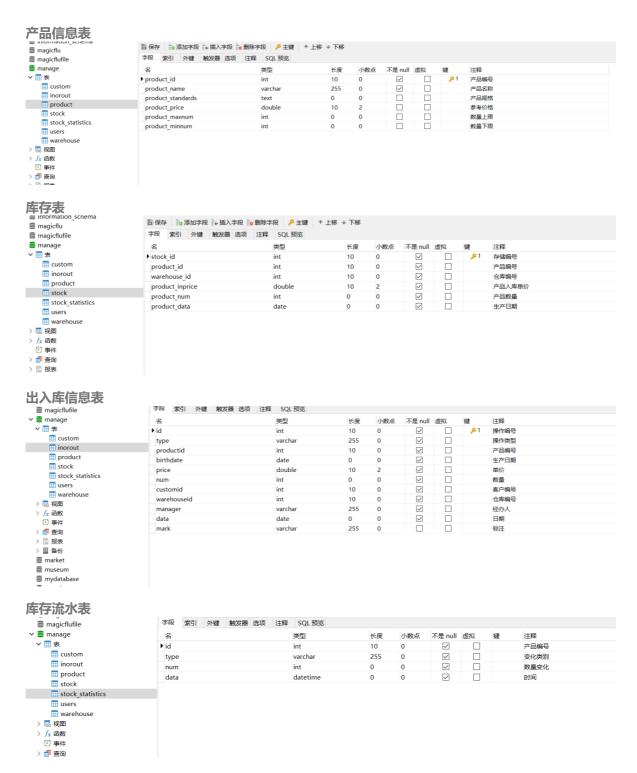

一个仓库可能存储好几种商品;一种商品也可能存放在多个仓库:

3.2 逻辑结构设计

根据数据库概念结构设计,将数据库概念结构转化为mysql 所支持的 关系模式如下:

第二阶段: 开发编码调试工作

1.开发环境相关:

开发后台服务语言: PHP 7.4.6
服务器: Apache 2.4.43
数据库: MySql 8.0.19
操作系统: Windows10
开发工具: Submile Text3

2.开发所用技术:

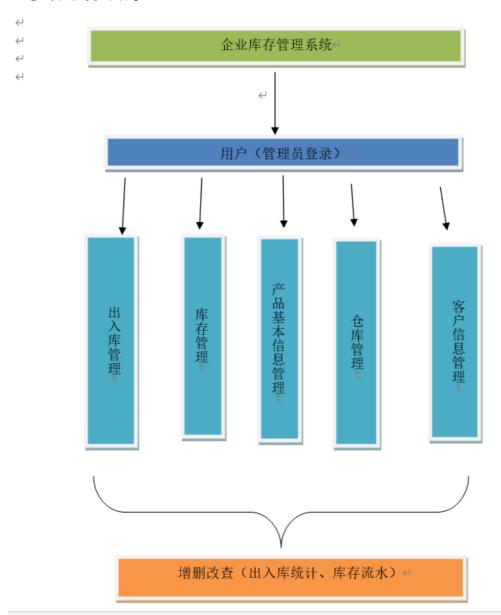

Web 前端: HTML, CSS, JavaScript, Jquery, PHP, layui。

后台: Mysql

3.运行说明:

- 将所有文件放到Apaceh安装目录下的htodcs目录下
- 确保Apache服务器已经启动,如果没有启动,使用powershell(管理员)(A)运行。
- index.html (我设置的内容是登录界面) 要直接放在htodcs目录下。
- 在浏览器地址栏输入localhost即可进入登录页面。 (输入localhost/index.html也可)

4.系统总体设计

5.目录结构

	product-list.php
	statistics.php
	statistics1.php
<>	stock-add.html
	stock-change.php
	stock-delete.php
	stock-list.php
<>	user-add.html
	user-change.php
	user-delete.php
	user-list.php
<>	warehouse-add.html
	warehouse-change.php
	warehouse-delete.php
	warehouse-list.php
<>	welcome.html

说明:

- index.html+login.php实现登录功能。
- index1.php是系统主界面框架
- welcome.html是欢迎页面,进入到系统后显示的内容
- statistics.php是出入库统计信息
- statistics1.php是库存流水信息
- 以出入库为例,inorout-lits.php是出入库管理界面,inorout-change.php+changeinorout.php实现出入库信息修改;inorout-add.html+addinorout.php实现出入库记录的添加功能;inorout-delete.php实现出入库数据的删除功能。其他管理模块于此类似,可以参考此模块的构造。

6.源码及界面展示:

6.1 登录

```
<!DOCTYPE html>
<html>
<meta charset="utf-8">
<head>
   <!--localhost/login.html-->
    <title>企业库存管理系统</title>
</head>
<style type="text/css">
   html,body {
                margin: 0;
                padding: 0;
                height: 100%;
           }
           body
            {
                background: #000000;
                background: url(001.jpg) ;
            }
    table {
       width:20%;
   }
   td{
        height:32px;
        padding:5px;
   }
    input{
       width: 200px;
        height: 30px;
        border-radius: 5px;
   }
   div{
       margin-top: 10%;
   }
    button{
        background-color: #e7e7e7;
        border: none;
        border-radius: 5px;
        color: black;
        width: 150px;
        padding: 15px 32px;
        text-align: center;
        text-decoration: none;
        display: inline-block;
       font-size: 16px;
    button:hover {
        box-shadow: 0 12px 16px 0 rgba(0,0,0,0.24), 0 17px 50px 0
rgba(0,0,0,0.19);
   }
</style>
<body>
<form action="login.php" method="post">
    <div style="">
        <center>
            <h3 style="color:red" align="center">企业库存管理系统</h3>
```

```
账号:
              <input type="text" name="userid" placeholder="请输入账号">
密码: 
              <input type="text" name="password" placeholder="请输入密
码">
           <button type="submit">登录</button>
      </center>
  </div>
</form>
</body>
</html>
```

```
<?php
   //接收数据
   $userid=$_POST['userid'];
   $password=$_POST['password'];
   // 创建连接数据库
   $link=mysqli_connect('localhost','root','123456','manage');
   //设置字符
   mysqli_query($link,"set names utf8");
   //连接失败 进行提示错误
   if(!$link)
   {
       die('连接失败: '.mysqli_connect_error());
   }
   else
   {
       echo "连接成功";
   }
   //查询账号是否存在
   $sql="select * from users where userid='$userid'";
   $arr=mysqli_query($link,$sql);
   $arr=mysqli_fetch_assoc($arr);
   //判断该账号是否存在
   if(!$arr)
       echo "<script>alert('账号不存在,点击重新登
录! ');window.location.href='index.html';</script>";die;
   }
   //取出密码
   $password1=$arr['password'];
   $username=$arr['username'];
   //判断密码是否正确
   if($password!=$password1){
       // echo "<a href='http://localhost/keshe/index.html'>密码错误,点击重新登录
</a>";die;
       echo "<script>alert('密码错误,请重新登
录! ');window.location.href='index.html';</script>";die;
   }
   else
```

```
{
    echo "<script>window.location.href='index1.php?username=$username';
</script>";die;
}
```

6.2 主界面

```
<?php
if(!isset($_GET['username']))
    echo "<a href='index.html'>你还未登录,点击登录</a>";die;
}
$name=$_GET['username']

                        <cite>客户信息管理</cite>
                        <i class="iconfont nav_right">&#xe697;</i></a>
                     <1i>>
                     <a onclick="xadmin.add_tab('用户管理','user-list.php')">
                        <i class="iconfont" lay-tips="用户管理">&#xe6b8;</i>
                        <cite>用户管理</cite>
                        <i class="iconfont nav_right">&#xe697;</i></a>
                     </u1>
          </div>
       </div>
       <!-- <div class="x-slide_left"></div> -->
       <!-- 左侧菜单结束 -->
       <!-- 右侧主体开始 -->
       <div class="page-content">
```

```
<div class="layui-tab tab" lay-filter="xbs_tab" lay-</pre>
allowclose="false">
               class="home">
                       <i class="layui-icon">&#xe68e;</i>我的桌面
               <div class="layui-unselect layui-form-select layui-form-</pre>
selected" id="tab_right">
                       <dd data-type="this">关闭当前</dd>
                       <dd data-type="other">关闭其它</dd>
                       <dd data-type="all">关闭全部</dd></dl>
               </div>
               <div class="layui-tab-content">
                   <div class="layui-tab-item layui-show">
                      <iframe src='welcome.html' frameborder="0"</pre>
scrolling="yes" class="x-iframe"></iframe>
                   </div>
               </div>
               <div id="tab_show"></div>
           </div>
       </div>
       <div class="page-content-bg"></div>
       <style id="theme_style"></style>
       <!-- 右侧主体结束 -->
       <!-- 中部结束 -->
   </body>
</html>
```

6.3 功能举例 (以出入库为例, 其他的于此类似)

6.3.1查看界面

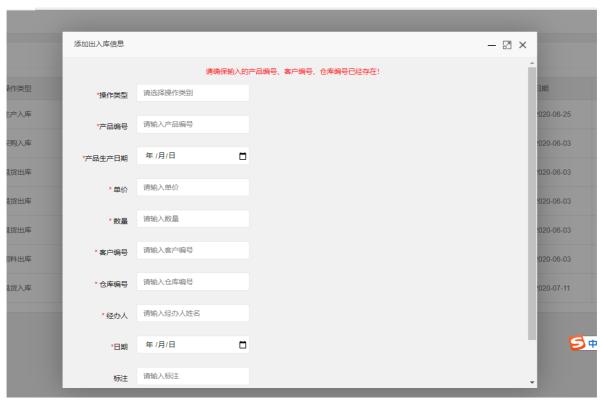

```
<?php

// 创建连接数据库
  $link=mysqli_connect('localhost','root','123456','manage');
//设置字符
  mysqli_query($link,"set names utf8");
//连接失败 进行提示错误</pre>
```

```
if(!$1ink){
       die('连接失败: '.mysqli_connect_error());
  // echo "连接数据库成功";
   $sql="select * from inorout";
   $result=mysqli_query($link,$sql);
?>
<!DOCTYPE html>
<html class="x-admin-sm">
   <head>
       <meta charset="UTF-8">
       <title>出入库信息管理</title>
       <meta name="renderer" content="webkit">
       <meta http-equiv="X-UA-Compatible" content="IE=edge,chrome=1">
       <meta name="viewport" content="width=device-width,user-scalable=yes,</pre>
minimum-scale=0.4, initial-scale=0.8,target-densitydpi=low-dpi" />
       <link rel="stylesheet" href="./css/font.css">
       <link rel="stylesheet" href="./css/xadmin.css">
       <script src="./lib/layui/layui.js" charset="utf-8"></script>
       <script type="text/javascript" src="./js/xadmin.js"></script>
   </head>
   <body>
       <div class="x-nav">
           <a class="layui-btn layui-btn-small" style="line-</pre>
height:1.6em;margin-top:3px;float:right" onclick="location.reload()" title="刷
新">
              <i class="layui-icon layui-icon-refresh" style="line-</pre>
height:30px"></i>
          </a>
       </div>
       <div class="layui-fluid">
           <div class="layui-row layui-col-space15">
              <div class="layui-col-md12">
                  <div class="layui-card">
                      <div class="layui-card-header">
                         <button class="layui-btn" onclick="xadmin.open('添加
出入库信息','inorout-add.html',800,600)">
                             <i class="layui-icon">□</i>添加</button></div>
                      <div class="layui-card-body ">
                         <thead>

            <label for="L_repass" class="layui-form-label"></label>
            <button class="layui-btn" type="submit">提交</button></div>
        </form>
        </div>
        </div>
   </body>
</html>
```

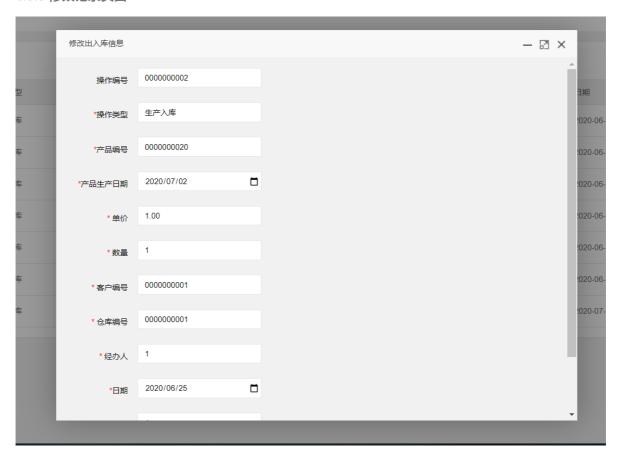

```
<?php
   $id=$_POST['id'];
   $type=$_POST['type'];
   $productid=$_POST['productid'];
   $birthdate=$_POST['birthdate'];
   $price=$_POST['price'];
   $num=$_POST['num'];
   $customid=$_POST['customid'];
   $warehouseid=$_POST['warehouseid'];
   $manager=$_POST['manager'];
   $data=$_POST['data'];
   $mark=$_POST['mark'];
   // 创建连接数据库
   $link=mysqli_connect('localhost','root','123456','manage');
   mysqli_query($link,"set names utf8");
   //连接失败 进行提示错误
   if(!$link)
   {
```

```
die('连接失败: '.mysqli_connect_error());
}
else
{
    //echo "连接成功";
}

mysqli_query($link,"UPDATE inorout SET
type='$type',productid='$productid',birthdate='$birthdate',price='$price',num='$
num',customid='$customid',warehouseid='$warehouseid',manager='$manager',data='$d
ata',mark='$mark'
WHERE id='$id'");

    echo "<script>parent.location.href='inorout-list.php';</script>";die;
    //echo "<script>alert('修改成功');parent.location.href='inorout-list.php';</script>";die;
?>
```

6.3.4 修改界面提示界面及操作代码(函数在inorout-list.php中)

```
<?php
   $id=$_GET['id'];
   // 创建连接数据库
   $link=mysqli_connect('localhost','root','123456','manage');
   mysqli_query($link,"set names utf8");
   //连接失败 进行提示错误
   if(!$link)
       die('连接失败: '.mysqli_connect_error());
   }
   else
   {
       echo "连接成功";
       echo "id=$id";
   }
   mysqli_query($link,"DELETE FROM inorout WHERE id='$id'");
       echo "<script>location.href='inorout-list.php';</script>";die;
       //echo "<script>alert('删除成功');location.href='inorout-list.php';
</script>";die;
```

6.3.5 出入库统计报表

```
<?php
    // 创建连接数据库
    $link=mysqli_connect('localhost','root','123456','manage');
   mysqli_query($link,"set names utf8");
    //连接失败 进行提示错误
   if(!$1ink){
        die('连接失败: '.mysqli_connect_error());
   // echo "连接数据库成功";
    $choosedate=date('yy-m-d');
   // echo $choosedate;
?>
<!DOCTYPE html>

第三部分: 总结

通过这次课设,学习了php语言,实现了与数据库的连接、数据传递。第一次做出一个小的系统,虽然不是很完善,但是这个过程是比较锻炼人的。感觉通过这次课设,知识面扩展了很多,很有意义。

感谢老师这个特殊的时期还不断敦促我们去学习, 谢谢老师们!
